MANIKANTA KORIMILLI

manikantakorimilli21@gmail.com | +91 9492014400 | linkedin.com/in/manikorimilli | github.com/manikorimilli | Portfolio

TECHNICAL SKILLS

Languages:	Java, JavaScript, TypeScript, C++
Frontend:	React.js, TanStack Query, TanStack Router, Redux, Zustand, TailwindCSS, Shadcn UI
Backend:	Spring Boot, Node.js, REST APIs, Microservices, Event-Driven Architecture, RabbitMQ, DTFx
Databases:	MongoDB, PostgreSQL, Redis
Agentic AI & Tools:	Git, GitHub Actions (CI/CD), Docker, LLM APIs (OpenAI, Anthropic), Prompt Engineering, RAG, MCP, AI-Assisted Development (Claude Code)
Others:	DSA, Competitive Programming, OOPS, System Design, API Design, Azure Cloud

EXPERIENCE

Software Development Engineer 1 Aug 2025 – Present

DeeptaAI *Hyderabad, India*

- Re-architected report generation for different departments as an async, idempotent pipeline on RabbitMQ and Redis, making the analytics service **30%** faster and cutting monthly report wait time from **40s** to **10–15s**.
- Engineered a robust cohort sync solution exporting user data to external platforms, integrating webhooks and automated schedules, reducing sync failures by **30%**.
- Launched "Compass", a feature that forecasts user behavior tied to retention, with a component-driven UI/UX.
- Resolved **100+** issues with QA and product teams, using AI-driven development (Claude Code, MCP, subagents).

Associate Software Development Engineer Apr 2025 – Aug 2025

Apxor *Hyderabad, India*

- Debugged chatbot workflows on the Kore.ai platform, improving conversational reliability and bot performance.
- Developed the frontend of a store inventory management system that renders **10,000+** rows without lag, using list virtualization, windowing, and optimized painting to minimize re-renders.
- Secured public APIs with replay protection and AES-256-GCM encryption for customer and transaction data.

Freelance Nov 2024 – Apr 2025

Outlier AI *Remote*

- Delivered **10+** client projects, turning each client's requirements into JavaScript solutions that passed review.
- Authored **120+** original DSA problems with C++ reference solutions to train and evaluate AI models on coding tasks.
- Reviewed AI-generated code for correctness and reasoning quality, giving feedback that improved model responses.

PROJECTS

Multi-Provider Messaging Service | *Java, Spring Boot, React, TailwindCSS, Azure* GitHub | Live App

- Built a multi-channel messaging service (SMS, WhatsApp, Email) for single, batch (up to **100** recipients), and scheduled daily sends via configurable providers (Twilio, Vonage).
- Optimized scheduled delivery processes by implementing Spring Scheduler cron jobs with a robust retry mechanism, reducing average delivery latency by **15%** and minimizing errors by **20%**.
- Automated CI/CD with GitHub Actions and deployed the service end to end on Azure Cloud.

Wooble

- Created a collaborative drawing board for architecture, design, and planning, with AI-enabled features.
- Modeled the board as one element array on two canvas layers for **60 fps** drag, resize, and rotate with **1,000+** shapes.
- Shipped text-to-diagram generation that turns a plain-English flowchart, architecture, or mind map into editable shapes.

EDUCATION

Aditya College of Engineering 2020 – 2024

B.Tech in Electronics and Communication Engineering, CGPA: 8.1 *Surampalem, Andhra Pradesh*

ACHIEVEMENTS & CERTIFICATIONS

- Red Hat Certified System Administrator (RHCSA).
- Top Performer, OwlCoder Program; ranked Top 10 in multiple college-level coding competitions (Technical Hub).
- Top Contributor, Outlier AI: awarded for consistently high reviewer ratings on AI training and coding tasks.
